NEW ORLEANS-BASED BLANCHARD SYSTEMS ANNOUNCES IT WILL BE ON-HAND DURING PRINT 05 AT THE DALIM SOFTWARE BOOTH, #6735

HOUSTON, Texas – September 6, 2005 – Blanchard Systems announces that it will participate in the Dalim Software booth, #6735 during Print 05, as planned. Blanchard Systems is a shareholder as well as National Distributor of Dalim Software products in North America, and has always played an important role with Dalim Software during major trade shows.

Last week, Blanchard Systems announced that it continues to serve all of its customers nationwide. Blanchard Systems headquarters are located at 650 Poydras Street, in the Central Business district of New Orleans. In the wake of hurricane Katrina, Blanchard Systems has relocated their corporate offices to Houston, TX. All New Orleans personnel have been relocated to corporate housing in Houston and customer support systems are operating in a 'business as usual' mode.

The office location and contact information is:

Blanchard Systems, Inc.
5353 West Alabama, Suite 420
Houston, TX 77056
Main Office: 713-980-3940
Fax: 713-980-3949

"Blanchard Systems looks forward to seeing everyone at Print 05. We appreciate all of the kind wishes our customers and prospects have sent, and would like to thank them in person," remarks Charles Blanchard, Blanchard Systems CEO. "More important, we want to send out a clear message to the industry that we are very much in business, and continue to effectively serve our client base. We have had a disaster recovery program in place for many years, which helped us considerably over the past week and a half. This is a classic example of a technology integration company practicing what they preach by not losing critical support infrastructure for one minute—despite taking a direct hit from a 'Category 4' hurricane. Nothing has changed at Blanchard Systems, other than the

address. We will continue to help our customers build and maintain effective production workflow systems.”

ABOUT BLANCHARD SYSTEMS, INC.

Blanchard Systems is a computer systems integration company providing the best digital prepress solutions in the industry. Specializing in automating workflow solutions that solve its customers' most pressing issues, their systems include: workflow servers, SANs, RAID subsystems, backup subsystems, high-speed digital file delivery, real time soft-proofing, and asset management systems. Through Blanchard's exhaustive research the company developed Vortex, a system of integrated solutions combining best-of-breed hardware and software exclusively designed to meet the needs of the prepress, printing, and publishing industry. Every Vortex system is engineered to ensure a reliable and scalable solution that is infinitely flexible and fully adaptable to meet customers' future requirements.
